According to the experiments of the best German chemists, the liquid manure from the horse amounts to one and a half tons per year, which contains nitrogen and four tons, containing \$14 worth of the same elements. These figures show the possible, even if only one-half the whole quantity be voided at the stables. If two horses and ten cows are kept, the liquid manure they would make, provided it could all be saved, would be worth \$165.50, or enough to buy about four tons of good phosphate. If but one half of it is voided in the barn, and the half of that any kind. is wasted for the lack of absorbents, or washed away by rains, it would require a ton of phosphate to replace the loss.

If it will pay to build a silo for a herd of ten cows, will it not pay to build a cistern to hold the liquid manure of the same number of animals? If dry earth and a half to two inches. If all seed could or peat be used as absorbents it would require at least its own weight in the absorbent. Would it not be easier to pump out and spread forty tons of liquid, than mer sowed about two hundred rods of to draw in forty tons of dry earth and drill with one quart of wheat, and hardraw out eighty tons thus saturated with vested eight bushels, and thought he moisture. These are practical questions for the consideration of the farmers, and bors, to whom a wheat head is a curiosity, worthy of their study.

not pay to allow soapsuds and all waste one foot apart, in an acre, it would require for the water from the house to run into it, thus a little over thirteen quarts of seed, and a saving whatever of fertilizing value may | yield equal to his would give over a hunbe in them, and at the same time dis- dred bushels per acre; or fifty bushels per posing of a material which is too often a acre could be grown in drills at two feet nuisance about the house, and which, in a apart, from six and a half quarts of seed. eye to the wants of the Trade, which our past few years, may so saturate the ground We do not advise farmers to go so far as near where the sink pipes discharge as to this in the matter of light seeding. They drain back into the well and pollute the cannot all have old garden soil to sow water supply of the house? Such a dilu- their seed upon, nor give it garden cultition of the liquid from the stables would vation, but we give this as an illustration only better fit it for application to of the possibilities of light seeding in good

#### Saving Seed Corn.

Every tarmer who has a good variet either of field corn or sweet corn should save his own seed, and should try to select even by those who have used them for it, so that it will improve under his cultivation rather than grow poorer. Attenbearing two ears, or more than that taken difference is seldom very perceptible the phosphoric acid makes a plumper, heavier corresponding increase in yield per acre. An ear ofc orn showing kernels of more particular he has failed in years past.

than one variety will produce ears which show the mixture more plainly than another ear, even if the intermixed kernels are not planted.

out of the way of rate and mice. Freezing will not hurt it after it is fully dry, bushels of corn to the acre." but dampness will. Even if it does not entirely destroy the germinating power, it a kind adapted to one soil may not do as letin. well on another. That which will give large yield upon rich soil under good cultivation might not perfect its growth under less favorable circumstances; while a kind that would grow upon poor soil could not give as large a crop as another kind if put in good soil. If the kernel is Charlotte. large and plump there will be greater weight of shelled corn to the bushel of ears. If in addition to these qualities the kernels are in straight even rows from the butt upward, and will cover the tips of and Jeans. the ear, the ears starting from the stalk near the ground of good size, and abundant enough to promise a profitable yield, then it may be considered a good variety

## Broken Legs.

I have known valuable horses, as well as other animals being killed because of their legs having been broken. A large proportion of them have been saved by proper treatment. The difficulty of managing an animal in the ordinary way with a broken leg, is that it keeps straining the leg, thus preventing the broken parts from knitting together. If the leg is swollen, cold water is one of the best ap plications for removing the swelling, and this should have immediate attention. After the bone is carefully set, encase the fractured (also a space above and below them) with heavy leather, something like a boot leg. Tin or wood might answer the same purpose. It should be large ton Boots, Children's High Button Boots. enough to leave two inches space all round the leg, which space should be filled in with solid wet plaster of Paris. The Polish, Fine Button Hooks, Stocking Heel Prolatter will harden very quickly and hold the bone as securely in position as though it were in a block of wood, still allowing a free circulation of blood within the leg .-Exchange.

## Improvements and Repairs.

Those who do not have wheat to sow can perhaps find time to make what are called permanent improvements. Ditching and draining of land, building walls 1873. and fences, or removing those which are not needed and cumber the ground, cutting down unsightly hedges, which harbor insects and vermin, carting sand or loam upon low land, digging muck to use as an absorbent in stables and yards, all may come under this head. This is a good season for painting buildings and wood work of machinery and plows. With the prepared ready-mixed paints in the market the farmer can do much of this himself, if he has not other occupation, especially where the object is pre servation of the wood rather than ornament. Paint and putty properly used add greatly to the durability of wood, and the farm carts and wagons should receive attention every year, as well as smaller

INFLAMED EYES .- A horse whose eye is inflamed from any cause should be protected from the light and the eye strengthened as much as possible by tonic applications, as cold solution of three grains of sulphate of zinc to one of water. In case of dust, a wire frame fitted with a fine green gauze should be fitted over the eyes to arrest the dust.

FILTHY STABLES. - According to Dr. J. C. Peters, it is filth that causes most of season. the diseases of domestic animals. He mentions particularly the habit of allowing bedding and manure to accumulate under the horses and other animals in stables. The impure air thus generated we have them and will sell you cheap. Come is peculiarly well adapted to injure the and see what bargains we are offering. health of the animals compelled to breathe it.

Wheat Culture.

In many sections the labor of putting in the wheat will be an important part of the labor this month. The ground will need at least one more thorough stirring with cultivator or harrow before the seed is sown. It cannot be made too mellow or potash worth \$12.75. The cow furnishes be too finely pulverized for a seed bed, four tons, containing \$14 worth of the and as each stirring assists in germinating and destroying the weed seed that lie importance of saving all the liquid manure dormant in the soil it will allow the plants to get better growth before the weeds spring up to choke them out, and give cleaner crops next year. No seed should be used which has not been first carefully screened and winnowed, for the removal of foul stuff from it, and to take out shrunken, light or imperfect seed of

The usual amount of seed used is from one bushel to five pecks to the acre when drilled in, and about half a bushel more when sown browdcast, to make up for loss of seed by covering too deep or not deep enough, the proper depth being about one be placed at equal distances apart, and at equal depths, a much less amount of seed would be sufficient. A Connecticut farwould have had more if birds and neighcould have been kept away from it. As If such a cistern were built, would it there could be over 2,600 rods of drill, Dry Goods business of the State Our Goods

The use of a good superphosphate has been found to greatly stimulate the growth of wheat; but the difference in phosphates is but imperfectly understood | Or some article in many years, and many fail in their experiments because of not knowing how to tion to a few rules will enable him to do adapt them to their crops or soils. As a this with almost absolute certainty. Seed general rule, it may be said that for this more good ears will produce more stalks growth of leaf and stalk, and makes it more rapid, potash stiffens the straw and from stalks bearing only one ear; but this prevents the lodging of the grain, and first year, as corn is not self-fertilizing. grain, and a better flour. Of course each After three years' selection the difference of these ingredients assists in other ways; becomes very noticeable, and will make a but these hints may help the farmer to improve his crop when he knows in what

FLINTY CORN .- A gentleman in the Western part of the State writes as fol- yourself if this claim is not well sustained. lows: "I mail you to-day an ear of corn After seed corn is selected there is no from seed brought from Rhode Island, better way of keeping it than the old-fashioned method of braiding the husks gathered August 11th. Two and three line of together and hanging it up in a dry place | ears grow on one stalk, and at home, on good soil, has been known to yield 70

The corn is of the flinty variety so valued for conversion into breadstuff and weakens the plant and reduces the crop. homing. The ear is of medium size, and Different farmers will not agree upon the variety of corn most profitable to grow, as usually small.—N. C. Agricultural Bul. Colored Felts. MRS. P. QUERY & CO. March 18, 1887.

## Scrofula

Is one of the most fatal scourges which afflict mankind. It is often inherited, but may be the result of improper vaccination, mercurial poisoning, uncleanliness, and various other causes. Chronic Sores, Ulcers, Abscesses, Cancerous Humors, and, in some cases, Emaciation, and Consumption, result from a scrofulous condition of the blood. This disease can be cured by the use of Ayer's Sarsaparilla. I inherited a scrofulous condition of the blood, which caused a derangement of my whole system. After taking less than four bottles of Ayer's Sarsaparilla I am

Entirely Cured and, for the past year, have not found it necessary to use any medicine whatever. I am now in better health, and stronger, than ever before.—O. A. Willard, 218 Tremout st., Boston, Mass.

I was troubled with Scrofulous Sores for five years; but, after using a few bottles of Aver's Sarsaparilla, the sores healed, and I have now good health.— Flizabeth Warnock, 54 Appleton street,

Some months ago I was troubled with Scrofulous Sores on my leg. The limb was badly swollen and inflamed, and the sores discharged large quantities of offen-sive matter. Every remedy failed, until I used Ayer's Sarsaparilla. By taking three bottles of this medicine the sores have been entirely healed, and my health is fully restored. I am grateful for the good this medicine has done me. — Mrs. Ann O'Brian, 158 Sullivan st., New York.

Ayer's Sarsaparilla, Prepared by Dr. J. C. Ayer & Co., Lowell, Mass. Sold by all Druggists. Price \$1; six bottles, \$5. September 30, 1887.

### PURE, HARD AND BRILLIANT Brazillian Axis Cut Pebbles.

For sale by Hales & Boyne, Charlotte.

They are a natural stone, almost as herd as a diamond, take a high polish, will not scratch, nor will moisture collect on them in warm weather. They confer a brilliancy and a distinctness of vision, with an amount of ease and comfort not hitherto enjoyed by spectacle wearers. They neutralize and prevent the irritating rays of light from entering the eye. They improve, strengthen and preserve the

sight, thereby resting the optic nerves and in very many cases preventing headache. On account of the purity of the material of which they are made, they cause no dizziness or wavering of sight. Every pair warranted. The common, inferior Spectacles, which are sold and bought, regardless of their quality or accuracy, are made from inferior material or imperfect Lenses discarded from better grades. they stimulate heat, irritate and fatigue the eye they retract the rays of light unequally and fail to correct all optical defects.

We wish to impress upon the public the im portance of taking good care of their eyes, and never neglect using glasses when the first symptoms of failing sight appear. Every genuine pair is stamped with Trade-Mark-BP. The Peb les are set in Gold, Silver, Celluloid, Steel, Nickel, and Rubber Frames. For sale by HALES & BOYNE, Jewelers and Opticians, Charlotte, N. C.

## Jan. 1, 1884. A Sluggish Liver

Causes the Stomach and Bowels to become disordered, and the whole system to suffer from debility. In all such cases Ayer's Pills give prompt relief. After much suffering from Liver and Stomach troubles, I have finally been cured by taking Ayer's Cathartic Pills. I always find them prompt and thorough in their action, and their occasional use keeps me in a perfectly healthy condition.—Ralph Weeman, Annapolis, Md.

Twenty-five years ago I suffered from

a torpid liver, which was restored to healthy action by taking Ayer's Pills. Since that time I have never been with-

our them. They regulate the bowels, assist digestion, and increase the appetite, more surely than any other medicine. — Paul Churchill, Haverhill, Mass. INVIGORATED. I know of no remedy equal to Ayer's Pills for Stomach and Liver disorders. Fills for Stomach and Liver disorders. I suffered from a Torpid Liver, and Dyspepsia, for eighteen months. My skin was yellow, and my tongue coated. I had no appetite, suffered from Headache, was pale and emaciated. A few boxes of Ayer's Pills, taken in moderate doses, restored me to perfect health.—Waldo Miles, Oberlin, Ohio.

Ayer's Pills are a superior family medicine. They strengthen and invigorate the digestive organs, create an appetite, and remove the horrible depression and despondency resulting from Liver Complaint. I have used those Pills, in my family, for years, and they never fail to give entire satisfac-tion.—Otto Montgomery, Oshkosh, Wis.
